

HUB 4 PORTS USB 2.0 SELF POWERED

DESCRIPTION:

This USB 2.0 hub allows you to connect 4 USB devices to a single port on your computer.

DETAILED DESCRIPTION :

This USB hub allows you to connect up to 4 USB ports in same time to a single USB port on your computer.

It only uses one USB port on your computer, allowing you to connect up to 3 more devices than your computer initially configured.

This self-powered USB hub is sufficient for peripherals such as keyboards or mice.

However, it will not be able to manage energy consuming devices (example: external hard drives).
